

ABOUT ME

A highly motivated and adaptable Mechatronics Engineer with extensive experience in engineering projects, industrial automation, electromechanical design, and electronic circuit maintenance. Skilled in working under pressure, with strong communication and teamwork abilities. Known for my commitment, responsibility, and proactive approach to problem-solving. Passionate about sports, automation, programming, electronics, artificial intelligence and robotics, with a focus on continuous learning and innovation.

LANGUAGES

- Native Spanish
- Advanced English (BULATS C1)
- Basic German

PROGRAMMING LANGUAGES

- Ladder / SCL / STL (PLC)
- C++
- Java
- Python
- LabView
- MATLAB and Simulink
- CNC

INDUSTRIAL KNOWLEDGE

- PLC: Siemens (S7, WinCC, Tia Portal), Beckhoff (TwinCAT 3) and Delta.
- Vision: Keyence and Cognex.
- Robots: Staubli, ABB and KUKA.

CERTIFICATIONS

- SolidWorks Mechanical Design

ALFONSO GONZÁLEZ MARTÍNEZ

PROFESSIONAL EXPERIENCE

PLC Programmer Consultant.
K-LAGAN, Barcelona, Spain.
June 2024 – Present
Providing expert programming, troubleshooting, and optimization services for clients' industrial automation systems.

- Developed and programmed custom SCADA and PLC solutions for industrial automation systems, enhancing operational efficiency and process control.
- Designed and implemented standard function blocks for PLCs, optimizing system performance, maintainability, and scalability.
- Led on-site commissioning, system debugging, and troubleshooting, ensuring smooth integration of automation systems and compliance with technical specifications.
- Provided comprehensive post-project support, including performance tuning, and system updates.

Automation and Electrical Engineer.
FINERN Automation, San Luis Potosí, Mexico / Shanghai, China.
Aug. 2023 – May 2024
Responsible for programming and optimizing automatic production lines and machines for Tier 1 automotive suppliers.

- Programmed PLCs and HMIs for automated production lines, ensuring efficient cycle times and reliable process control.
- Integrated and programmed industrial robots for automation, reducing downtime and improving production throughput.
- Configured machine vision systems and sensors to monitor production quality.
- On site alignment, installation, and testing.
- Trained in industrial automation during an intensive program in Shanghai, China.

P-30 Engineering Intern.
Valeo, San Luis Potosí, México.
Feb. 2023 – July 2023
Participated, managed and leaded many engineering projects focused on giving a saving to the site and making efficient processes.

- Engineering development and design
- Project evaluation and viability.
- Purchasing software and databases such as SAP.

Controls Engineer.
FAUDEM, San Luis Potosí, México.
Nov. 2022 – Jan. 2023
Led the development of engineering projects.

- Created detailed electrical control panels diagrams, 3D CAD models, and PCBs.
- Managed the full assembly process, ensuring precise integration of both electrical and mechanical components for reliable system functionality.

EDUCATION

- Instituto Tecnológico y de Estudios Superiores de Monterrey.
  2018 - 2023
  Mechatronics Engineering.
- Universidad Politécnica de Madrid.
  Aerospacial Engineering. (Exchange Program)

QUALIFICATIONS AND SKILLS

- Reading and interpretation of electrical, mechanical and pneumatical diagrams.
- Familiar with industrial processes and automation equipment.
- Proficient in CAD softwares (AutoCAD, SolidWorks, Eplan).
- Quick learner, self-taught, versatile and multi-skilled.
- Proficient in Microsoft Office, advanced excel, data analytics.
- Daily desire to learn, to improve and to grow.
